

REMEDIAL SITE ASSESSMENT DECISION - EPA REGION 7

SITE NAME: K-42 & West Street Site

EPA ID#: KS0000900316

Alias Site Names: CECO site

City: Wichita

County or Parish: Sedgwick

State: KS

Refer to Report Dated: 4/29/2000

Report type: Expanded Site Inspection

Report developed by: Kansas Department of Health & Environment

Site: K-42 & West St.
ID # KS0000900316
Bro#: 1.5
Other: 8-15-2000

DECISION:

1. Further remedial site assessment under CERCLA (Superfund) is not required because:

- 1a. Site does not qualify for further remedial site assessment under CERCLA ☐ 1b. Site may qualify for further action, but is deferred to: ☐ RCRA ☐ NRC
No Further Remedial Action Planned (NFRAP)

X 2. Further Assessment Needed Under CERCLA: 2a. Qualifier: Higher ☒ Lower ☐ Part of NPL Site

☐ Referred to Removal, Needs More Remedial ☐ Referred to Removal, No Further Remedial

2b. Activity Type: ☐ PA ☐ SI ☐ ESI ☐ HRS evaluation

☒ Other: State voluntary or cooperative programs

DISCUSSION/RATIONALE:

1,1-DCA, 1,1-DCE, total 1,2-DCE, 1,1,1-TCA, and TCE have been detected in groundwater samples collected at the site at concentrations exceeding regulatory guidelines. The distribution of the contaminants in ground water suggests that at least two identified plumes of ground water contamination with separate source areas exist in the vicinity of Kansas Highway 42 and West Street. The site has been referred to KDHE's State Cooperative Program as an Enforcement/Negotiation candidate for a final attempt at negotiation of an agreement under either KDHE's State Cooperative or Voluntary Cleanup programs.

Based upon the above, the site will be coded in CERCLIS as a Lower priority, with other cleanup activity under the state voluntary or cooperative programs. If negotiations with the PRP's fail, EPA will re-evaluate.
